Portfolio: <https://www.atalek.com/>

## Summary:

Full stack developer with a strong frontend focus, passionate about crafting engaging user experiences and solving complex problems. Specializing in building responsive, interactive UIs using modern frameworks like Vue, Nuxt, React, Next.js and Astro, coupled with utility-first CSS frameworks such as TailwindCSS. Proficient in server-side development with Node.js, while maintaining a deep understanding of frontend architecture and performance optimization. Leveraging TypeScript for enhanced code quality and maintainability across the stack. Committed to staying current with emerging technologies and best practices in web development.

## Skills and competences:

- **Front-End Development:** Vue, Nuxt, React, Next.js, Astro with TypeScript
- **Styling libraries:** TailwindCSS & Bootstrap 5
- **Back-End Development:** Creating and integrating APIs in Node.js(Express & Nitro) with TypeScript
- **Databases:** SQL(PostgreSQL, SQLite, MySQL) & NoSQL(MongoDB)
- **Languages:** Macedonian(native),English(Professional Working Proficiency)

## Personal Projects:

- **Staystrella:** Vacation Rental Platform inspired by Airbnb, made with Nuxt 3, Tailwind CSS, Headless UI, Neon PostgreSQL, Drizzle ORM, Lucia Auth with GitHub and Google OAuth. It features responsive design for optimal viewing on any device, comprehensive property listings with essential details, easy property creation for hosts, advanced filters for users to refine searches, secure authentication via Lucia Auth, email verification and password reset through Resend, map integration with Leaflet, and image uploads via Cloudinary.
- **JobGlimpse-Job Board:** Job board web application built with Nuxt 3, TailwindCSS, Turso SQLite, Stripe and Cloudinary. Features include responsive design, easy job creation and featured post promotions.
- **ATAL-Pizza Food Ordering:** A full-stack food ordering application using Nuxt 3, MongoDB, TailwindCSS, Sidebase nuxt-auth, AWS S3 for image uploads, and Stripe checkout. Features include a shopping cart, user profiles, and admin tools for product,users and order management.
- **NuxtShop eCommerce:** eCommerce platform built with Nuxt 3, MongoDB, Pinia, Bootstrap 5, Lucia Auth and Stripe checkout. It includes essential functionalities such as a shopping cart, product reviews, and admin tools for seamless product, user, and order management.
- **AmpeDent:** Dental office web application built with Next.js,TailwindCSS,MongoDB with Mongoose and NextAuth.It includes functionality such as scheduling appointments and admin panel for appointment management.
