Summary:

Passionate web developer with a strong foundation in problem-solving and a thirst for mastering new technologies. Proactive and adept at autonomous work, tackling complex issues through independent research and initiative. Leveraging a diverse skill set in web technologies to craft beautiful, interactive UIs with frameworks like Vue, Nuxt, React, and Next.js. For server-side logic, I'm proficient in Node.js (Nitro and Express). Tailwind and Bootstrap are my go-to tools for design, while TypeScript's type safety and expressiveness elevate both the development experience and the maintainability of my code. A commitment to continuous learning ensures my solutions are modern and effective.

Skills and competences:

- **Front-End Development:** Vue, Nuxt3, React, Next.js (SPA & SSR) with Typescript
- **Styling libraries:** TailwindCSS & Bootstrap 5
- **Back-End Development:** Nodejs(Express & Nitro)
- **Databases:** SQL(SQLite, MySQL) & NoSQL(MongoDB)
- **Languages:** Macedonian(native), English(Professional Working Proficiency)

Personal Projects:

- **[AmpeDent](#):** Dental office web application built with Next.js, TailwindCSS, MongoDB with Mongoose and NextAuth. It includes functionality such as scheduling appointments and admin panel for appointment management.
- **[JobGlimpse-Job Board](#):** Job board web application built with Nuxt 3, TailwindCSS, Turso SQLite, Stripe and Cloudinary. Features include responsive design, easy job creation and featured post promotions.
- **[ATAL-Pizza Food Ordering](#):** A full-stack food ordering application using Nuxt 3, MongoDB, TailwindCSS, Sidebase nuxt-auth, AWS S3 for image uploads, and Stripe checkout. Features include a shopping cart, user profiles, and admin tools for product, users and order management.
- **[NuxtShop eCommerce](#):** eCommerce platform built with Nuxt 3, MongoDB, Pinia, Bootstrap 5, Lucia Auth and Stripe checkout. It includes essential functionalities such as a shopping cart, product reviews, and admin tools for seamless product, user, and order management.
- **[ampeConvert](#):** Image processing web application built with React, TailwindCSS, Express, sharp and AWS S3. It allows users to convert images into different formats and resize them according to their needs.
